

Over this half term Derwen Bach have been looking after three chick eggs. We have been counting down the days, learning about their life cycle and how to take care of them. When we arrived in school on Monday our first chick had hatched, followed closely by the second chick which we watched hatch out and the third chick hatched the following morning. We have had some much fun and the children have been amazing helping take care of them. The children have named the chicks, Lemon drop, Reggie and Snowdrop.
