

## Xplore Nature!

The children in Celyn class had a wonderful trip and day in the forest with Xplore Nature! The children were digging holes to explore the soil and found different stones materials and artefacts from hundreds of years ago. They created their own tree artwork – a mythical creature they had to design to protect different types of nature or animals. As well as this, lots of Maths in the outdoors with measuring, using radius, diameter and calculating volume. All finished with a hot chocolate and popcorn made over the stove!
