

Our world at risk – endangered species

Carousel of activities.

We have been learning about 'Our world at risk' and focusing on endangered species for these tasks. The children had a fun afternoon doing a carousel of activities which included: freeze frames representing endangered species; outdoor searching for endangered species in Wales or around the world; endangered species pairs analysing population, life span, risk factors; coming up with a fundraiser event to save the planet; taking part in a 'help or harm' task, identifying things that either help or harm Earth.
